

# VN 21/60 Junior Systems and Infrastructure Engineers (2 ECEP Posts)

Within the Computer and Storage Management Competence Area (CSM CA) of the Generic Systems and Infrastructure (GSI) Division, the Junior Computer Systems Architecture Engineer and Junior Cloud Engineer will support the full lifecycle of the computer and storage systems infrastructure. The post holders activities will include the analysis, design, development and testing of distributed hardware and system software.

## Duties

- Design, prototype, develop small to medium size IT infrastructure services in alignment with IT roadmaps and systems development life cycles by translating requirements into technical specifications, creating detailed solution designs and coordinating the construction, installation, configuration as well as the testing of IT systems;
- Provide the most appropriate technology on the market for future developments and evolution of the operational environments via technical interactions with IT vendors and experts and by prototyping of case studies of different IT solutions with external industry support;
- Contribute to the generation of technical baseline documentation, involving requirements engineering of the related services, interface specifications, design of functions and software applications;
- Provide support to engineering change proposals, configuration and quality control activities.

## Skills and Experience

### LOCATION

Darmstadt, Germany

### QUALIFICATIONS

An (anticipated) university degree in a relevant engineering discipline (e.g. Computer Science, Information Technology, System Engineering). Please note, the qualification must be awarded prior to the contract being issued.

### LANGUAGES

The official languages of EUMETSAT are English and French. Candidates must be able to work effectively in English and have some knowledge of French.

### DEADLINE

19 January 2022

- Good knowledge of IT systems architecture components and technology involving:
  - Virtualization
  - Containerization
  - Cloud based solutions (on premises, hybrid, public)
  - Distributed systems
- Clear IT customer/service driven perspective, preferably based on ITIL methodology;
- Strong motivation to develop towards full professionalism in the areas of system engineering of IT infrastructure services in an operational 24/7 environment;
- Readiness to learn and expand one's own knowledge, combined with excellent interpersonal skills and the proven ability to work in a team.

## Employment Conditions

The initial contract will be of 4 years' duration, with subsequent 5 year contracts being awarded thereafter, subject to individual performance and organisation requirements. There is no limit to the amount of follow-up contracts a staff member can receive up to the EUMETSAT retirement age of 63 and there are certainly opportunities to establish a long career perspective at EUMETSAT.

This post is graded A2/A4 on the EUMETSAT salary scales. The minimum basic salary for this post is EURO 5,363 per month (net of internal tax but excluding pension contribution and insurances) which may be negotiable on the basis of skills and experience. The salary scale provides for increments on the anniversary of taking up employment, and scales are reviewed by the EUMETSAT Council with effect from 1 January each year. In addition to basic salary, EUMETSAT offers attractive benefits. Further information, including salary details, is available on the EUMETSAT web site.

**EUMETSAT is committed to providing an equal opportunities work environment for men and women.**

**Please note that only nationals of EUMETSAT Member States may apply. The EUMETSAT Convention requires that Staff shall be recruited on the basis of their qualifications, account being taken of the international character of EUMETSAT.**

## About EUMETSAT

EUMETSAT is Europe's meteorological satellite agency. Its role is to establish and operate meteorological satellites to monitor the weather and climate from space - 24 hours a day, 365 days a year. This information is supplied to the National Meteorological Services of the organisation's Member States in Europe, as well as other users worldwide.

EUMETSAT also operates several Copernicus missions on behalf of the European Union and provide data services to the Copernicus marine and atmospheric services and their users.

As an intergovernmental European Organisation, EUMETSAT has 30 Member States (Austria, Belgium, Bulgaria, Croatia, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, The Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.)
