A WORLD OF DIFFERENCE

# INTERNSHIP IN THE STRATEGY, COMMUNICATION AND INTERNATIONAL RELATIONS DIVISION

In line with its Strategy, EUMETSAT is supporting various activities and project for developing countries, with a focus on Africa, Western Balkan and Eastern European countries. The objective is to help the users to get easier access to, and make best use of EUMETSAT data, products and services to help individual countries and regions to meet their respective needs. In recent years, EUMETSAT has also extended these activities to support access and use of Copernicus data, with a focus on the Sentinel mission operated by EUMETSAT.

After learning on activities and projects undertaken by EUMETSAT in support to developing countries, the project will consist in identifying, listing and illustrating best practices for accessing and using EUMETSAT data and products, across the various regions and user communities.

The findings will be organised in a database that can be shared openly (web-based), so that other users can learn from these best practices, and thus supporting the spread of knowledge.

The intern will work mainly with the Strategy, Communication and International Relations (SCIR) division. The intern will also interact with other divisions at EUMETSAT (e.g. User Service Division). The intern will also be in contact with some EUMETSAT users in developing countries, either through interview or in person during meeting or Fora.

## DUTIES

Desktop search;  
Interview with EUMETSAT staff involved in activities in support to developing countries;  
Interview of users;  
Establishment of an open

Organisation and preparation of meetings;

The EUMETSAT Convention requires that Staff shall be recruited on the basis of their qualifications, account being taken of the international character of EUMETSAT.**

## ABOUT EUMETSAT

EUMETSAT is Europe's meteorological satellite agency. Its role is to establish and operate meteorological satellites to monitor the weather and climate from space - 24 hours a day, 365 days a year. This information is supplied to the National Meteorological Services of the organisation's Member and Cooperating States in Europe, as well as other users worldwide.

EUMETSAT also operates several Copernicus missions on behalf of the European Union and provide data services to the Copernicus marine and atmospheric services and their users.

As an intergovernmental European Organisation, EUMETSAT has 30 Member States (Austria, Belgium, Bulgaria, Croatia, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, The Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.)
