

VN 21/21 IT Systems Engineer

This position is located within the EUMETSAT General Services Division (GES), which is responsible for all facility management and site infrastructure projects and services at EUMETSAT. The GES specific/specialised tools and systems for building monitoring and building security systems are hosted on a dedicated secured IT infrastructure. EUMETSAT has two dedicated IT Divisions, one responsible for the generic office IT infrastructure and a second one responsible for the IT infrastructure required to operate EUMETSAT's satellites and IT Security matters.

Within the General Services Division (GES), the IT Systems Engineer is responsible for the maintenance, development and management of the GES IT Infrastructure hosting building monitoring systems for power, security and HVAC and associated applications and documentation. Furthermore, he/she acts as interface to the dedicated IT Divisions. He/She will coordinate the support provided to GES by these IT Divisions for all IT tasks that are not part of the GES IT Infrastructure.

The IT Systems Engineer is a member of a team of engineers and technicians maintaining the technical building facilities.

Duties

- Act as the interface to the IT Divisions, manage and support the GES IT Systems Infrastructure with its servers and applications and the physical network infrastructure related to the facility management and site;
- Ensure and monitor regular servicing and maintenance of all GES systems inside the IT infrastructure, including the procurement and management of support contracts of the hosted applications;
- Support all facility management and site infrastructure activities at application and IT Systems Infrastructure level;
- Implement and ensure compliance with applicable internal regulations of the EUMETSAT Information Security Management System (ISMS) based on ISO/IEC27001;
- Plan the renewal and future development of all systems of the GES LAN and its network infrastructure, and

LOCATION

Darmstadt,
Germany

QUALIFICATIONS

University degree (or equivalent) in information technology or another relevant discipline. An additional vocational training in a technical discipline related to facility or building systems would be an advantage.

LANGUAGES

The official languages of EUMETSAT are English and French. For the post, candidates must be able to work effectively in English and due to interactions with local suppliers have at least a working knowledge of German.

DEADLINE

2 May 2021

support the budget and end of life planning for these systems.

Skills and Experience

- Proven experience in the design and operation of complex IT systems, including servers, operating systems based on MS Windows, application handling and networking infrastructure. Knowledge of Linux based systems would be advantageous;
- Expertise in the field of critical building monitoring systems and experience working in a full time 24/7 operational environment would be advantageous;
- Knowledge of applicable German and European regulations for information technology such as EN, DIN and quality management based on the ISO 9001 standards;
- Good knowledge of standard office applications like MS-Office and Outlook, a certain knowledge of AutoCAD, CAFM and Project Management tools would be advantageous;
- Strong analytical, problem solving, planning and communication skills, and the ability to work within a team.

Employment Conditions

The initial contract will be of 4 years' duration, with subsequent 5 year contracts being awarded thereafter, subject to individual performance and organisation requirements. There is no limit to the amount of follow-up contracts a staff member can receive up to the EUMETSAT retirement age of 63 and there are certainly opportunities to establish a long career perspective at EUMETSAT.

This post is graded A2/A4 on the EUMETSAT salary scales. The minimum basic salary for this post is EURO 5,363 per month (net of internal tax but excluding pension contribution and insurances) which may be negotiable on the basis of skills and experience. The salary scale provides for increments on the anniversary of taking up employment, and scales are reviewed by the EUMETSAT Council with effect from 1 January each year. In addition to basic salary, EUMETSAT offers attractive benefits. Further information, including salary details, is available on the EUMETSAT web site.

EUMETSAT is committed to providing an equal opportunities work environment for men and women.

Please note that only nationals of EUMETSAT Member States may apply. The EUMETSAT Convention requires that Staff shall be recruited on the basis of their qualifications, account being taken of the international character of EUMETSAT.

About EUMETSAT

EUMETSAT is Europe's meteorological satellite agency. Its role is to establish and operate meteorological satellites to monitor the weather and climate from space - 24 hours a day, 365 days a year. This information is supplied to the National Meteorological Services of the organisation's Member States in Europe, as well as other users worldwide.

EUMETSAT also operates several Copernicus missions on behalf of the European Union and provide data services to the Copernicus marine and atmospheric services and their users.

As an intergovernmental European Organisation, EUMETSAT has 30 Member States (Austria, Belgium, Bulgaria, Croatia, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, The Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.)
