

VN 22/25 Information Security Engineer

In the [EUMETSAT](#) matrix organisation, the Technical and Scientific Support (TSS) department provides support to the development and operations of EUMETSAT satellite systems, in particular ground systems, and contributes to the operational management of the cross-organisational Information Security Management System.

As a member of the growing Security Team of the Generic Systems and Infrastructure (GSI) division, the Information Security Engineer will act as a technical lead for the on-going Identity and Access Management project and, together with other team members, support the architecture and implementation of several cutting-edge security solutions from an extensive ISMS roadmap.

Duties

The duties will be as follows:

- Supervise, coordinate and verify the implementation and operation of the Information Security Management System (ISMS), including infrastructure, network, storage, computers, containers and software, for all IT security aspects;
- Organise, execute, evaluate and follow-up information security assessments;
- Identify, report and follow-up on relevant information security risks;
- Provide expertise on information security requirements, architecture definition and implementation, to the development and/or procurement of new systems and security solutions;
- Act as point of contact for relevant information security-related aspects;
- Maintain appropriate contacts with special interest groups relating to information security, and/or other specialist forums;
- Provide information security training and contribute to security awareness initiatives at organisational level.

Skills and Experience

LOCATION

Darmstadt,
Germany

QUALIFICATIONS

A university degree in a relevant discipline e.g. Computer and Network Security.

CISSP or a similar certification are an advantage.

LANGUAGES

The official languages of EUMETSAT are English and French. Candidates must be able to work effectively in English and have some knowledge of French.

DEADLINE

5 October 2022

In-depth knowledge and proven experience of:

- Implementation, operation and maintenance of an Information Security Management System (ISMS), including security solutions, preferably in 24/7 high-availability environments. In-depth experience with Identity and Access Management is a must, both on the technical and process-related aspects;
- Engineering of IT Security solutions for networks, computer systems, containers and application software, covering the whole engineering process from use case and requirements definition to verification and validation.
- Security assessments on operational/production systems;
- Excellent interpersonal, communication and team working skills;
- Critical thinking with a methodical, proactive and organised approach to work combined with an aptitude for detail and accuracy;
- Excellent time management and demonstrated ability to work efficiently under pressure / in emergency situations.

Employment Conditions

The initial contract will be of 4 years' duration, with subsequent 5 year contracts being awarded thereafter, subject to individual performance and organisation requirements. There is no limit to the amount of follow-up contracts a staff member can receive up to the EUMETSAT retirement age of 63 and there are certainly opportunities to establish a long career perspective at EUMETSAT.

This post is graded A2/A4 on the EUMETSAT salary scales. The minimum basic salary for this post is EURO 5,363 per month (net of internal tax but excluding pension contribution and insurances) which may be negotiable on the basis of skills and experience. The salary scale provides for increments on the anniversary of taking up employment, and scales are reviewed by the EUMETSAT Council with effect from 1 January each year. In addition to basic salary, EUMETSAT offers attractive benefits. Further information, including salary details, is available on the EUMETSAT web site.

EUMETSAT is committed to providing an equal opportunities work environment for men and women.

Please note that only nationals of EUMETSAT Member States may apply. The EUMETSAT Convention requires that Staff shall be recruited on the basis of their qualifications, account being taken of the international character of EUMETSAT.

About EUMETSAT

EUMETSAT is Europe's meteorological satellite agency. Its role is to establish and operate meteorological satellites to monitor the weather and climate from space - 24 hours a day, 365 days a year. This information is supplied to the National Meteorological Services of the organisation's Member States in Europe, as well as other users worldwide.

EUMETSAT also operates several Copernicus missions on behalf of the European Union and provide data services to the Copernicus marine and atmospheric services and their users.

As an intergovernmental European Organisation, EUMETSAT has 30 Member States (Austria, Belgium, Bulgaria, Croatia, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, The Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.)
